Outstanding Website: Chapter Achievements

Provide brief descriptions as requested, and stay within the character limit for each

Please provide a brief description of your chapter and school (1500 character maximum) *

Manipal University Jaipur (MUJ), which launched in 2011 on the invitation from the Government of Rajasthan, as a self-financed State University, has redefined academic excellence in the region. The Manipal University Jaipur ACM Student Chapter organizes several events over the academic year, including workshops, seminars, competitions and many more.

Catering to a student body at different levels of technical knowledge, the events are kept at appropriate levels, stimulating the minds of beginners and experts alike. Chapter members are offered many opportunities, from mentors providing essential technical knowledge to information about lucrative internships up for grabs. Moreover, Coding Competitions, Guest Lectures and Hands-on Workshops are regularly organized, so as to allow students to practice, improve and showcase their skills.

Taking into consideration all of this, it isn't a surprise that it has become the largest technical club of MUJ. With an exceptional membership drive, the chapter fulfilled its goal of having 500+ local members and also became one of the largest ACM Student Chapters in India. The aforementioned achievements were only possible because of the zeal and frenzy that all the freshmen of MUJ's 2018-2022 batch showcased, who took part in all the activities organized by the chapter in a very enthusiastic manner.

Chapter Name: Manipal University Jaipur ACM Student Chapter

No. of members: 542

Awards Won: Runner-up for best ACM Student Chapter in India

Outstanding Chapter Website Essay Guidelines (4000 character maximum)

★

Tell us about the design and content of your website and any noteworthy features. Also tell us how you created it and what you do to keep it up to date. Don't forget to provide the URL so the judges can check it out.

The moment you enter the URL "muj.acm.org" on your internet browser, you are in for a ride! The landing page of the website is built on PHP, HTML, and CSS which makes updating content on the website quite quick, easy and efficient.

As the chapter organizes multiple student-teaching-student classes, the levels of which range from beginner to expert, an aid to the mentors have been given in the form of a Progressive Web Application, which takes the attendance of the students through the application itself (currently in beta).

Moreover, in the pipeline, there is a notification feature to the application, so that all the students, both Android and iOS users, stay updated with the chapter they have enrolled in, and wish to grow with.

The official website also has a Project section which lists all the current websites of the chapter, so as to show the transparency in the chapter for the good of the community.

In addition to that, there is a GitHub Organization which lets the students of the chapter collaborate with other students to work on multiple projects, and helps them grow in the field and branch they wish to explore and gives them a much-deserved platform to showcase their sheer hard work and determination.
